

UNLOCK YOUR GAME

There are going to be bad days on the course but you must never give up. You need to turn a terrible day of ball striking into a good score. You need to be able to purge a bad hole or bad shot from your mind and move on. The next several pages will help you do just that.

It is recommended that one or more of the following pages be placed on your bedroom wall or in some other area where they can be frequently seen and used.

Next time you're on the course performing below average don't make it worse! Remember these pages on your wall and salvage the day ... put down an acceptable score on the following pages!
